

Portrait of a Serious Photographer

Seventh in a Series

Carl Mondragon
Fine Art Photographer

Carl Mondragon is one of the many Serious Photographers you can't afford to miss in each issue of *PHOTO Techniques*.

Involvement in photography:

Carl is an internationally recognized and published fine art photographer with over 25 years of experience. He has traveled to many secluded and remote locations in search of breathtaking beauty, and captures light when the mood is just right. His photographic endeavors include macro, microscopic, wildlife, landscapes, astrophotography, modeling portfolios, commercial, architectural, electron microscopy and product shots. His varied expertise has led to a new vision in the capturing of images best described as intense and passionate, with a technical understanding and an artistic eye.

Winter Fallen

Importance of equipment:

“Without the full gamut of analog and digital tools and techniques, it would be impossible for me to produce my work. Knowing what and when to use is critical to my continued success.”

Herron View

How *PHOTO Techniques* helps his craft:

“My workflow and PT have great similarities. Both apply analog and digital technologies to teach and expand my understanding for all aspects of photography. The new levels in understanding I have gained through the pages of PT have been key to me being able to perfect my art.”
